Jose David Yepes Arango

Game Developer | Game Designer | Unity & C# | Unreal Engine 5
Medellín, Colombia (Remote / Open to Relocation) | jdyepes@hotmail.com | +57 321 830 4596
linkedin.com/in/jose-david-yepes-arango-3232a4126 | Portfolio: emberblast.itch.io

PROFESSIONAL SUMMARY

Game Developer and Game Designer with 6+ years of experience shipping games, mobile applications and XR experiences with Unity, C# and Unreal Engine 5. Track record across gameplay programming, systems design, level design and portfolio-wide design review, including evaluation of a 7-title studio catalog. Strong in rapid prototyping, game balancing, playtesting, technical design documentation and AI-assisted development workflows. Experienced leading multidisciplinary teams of programmers, artists and designers in Agile/Scrum environments, and publishing independent titles end to end for PC and mobile.

CORE COMPETENCIES

Game Design | Systems Design | Level Design | Gameplay Programming | Game Balancing | Economy Design | Progression Systems | Combat Systems | Rapid Prototyping | Playtesting & Design Review | Game Design Documentation (GDD) | Player Experience (UX) | Cross-Functional Collaboration | Team Leadership

TECHNICAL SKILLS

Engines & Tools: Unity Engine (URP, Prefabs, Addressables, Animator, Timeline, ScriptableObjects), Unreal Engine 5 (Blueprints, C++), Visual Studio, Cursor IDE, Jira, Trello, Figma, Miro

Programming: C#, C++, TypeScript, Python (foundational), Object-Oriented Programming, SOLID principles, Design Patterns, Modular Architecture, Performance Optimization, Debugging & Profiling

Game Development: Gameplay Systems, Combat Mechanics, RPG Systems, Racing Mechanics, UI/UX Implementation, Mobile Game Development (iOS/Android), VR/XR Development (HTC Vive), Physics, Animation Integration, Build & Deployment Pipelines

AI-Assisted Development: Claude Code, MCP (Model Context Protocol) workflows, Prompt Engineering, LLM-powered tooling and Slack bot automation, ChatGPT workflows

Production & Collaboration: Git / GitHub, Scrum, Agile, Kanban, Technical Documentation, Code Review, Sprint Planning, Stakeholder Communication, Remote Team Collaboration

Platforms: PC (Steam / Steamworks), iOS, Android, WebGL, VR headsets, itch.io

PROFESSIONAL EXPERIENCE

Founder & Indie Game Developer | EmberBlast | 2018 – Present | Independent

- Develop and publish independent games for PC and mobile, owning end-to-end production: game design, gameplay programming, UI integration, build deployment and marketing.
- Built an audience of 20,000+ followers across TikTok and social media through devlogs and gameplay content.
- Participate in multiple game jams and local competitions, shipping playable builds under tight time constraints.
- Apply AI-assisted production workflows to accelerate solo development across design, code and content pipelines.

Video Game Designer | indie.io (Freedom Games) · Freelance | Jun 2026 – Aug 2026 | Remote

- Owned design review and evaluation across a 7-title internal portfolio (strategy, roguelite, cozy sim, sci-fi combat and colony-management games), delivering written design feedback directly to studio leadership and the CEO.
- Ran structured playtesting passes on internal builds, documenting mechanics, systems, content, UX, game feel and balance issues with prioritized, actionable recommendations.
- Performed systems design analysis on live projects covering resource economy pacing, wave escalation and difficulty curves, progression gating and win-loop clarity.
- Designed and deployed an AI design-review assistant built on Claude and MCP, integrated into the studio Slack workflow, reducing turnaround time on design documentation and portfolio feedback.
- Maintained internal design knowledge bases and living documentation so distributed teams shared a single source of truth on design vision and known issues.

Interactive Software Developer – Unity | Alternova Inc. · Full-time | Jan 2025 – May 2026

- Developed and maintained mobile applications and interactive software in Unity and C# for production clients.
- Integrated AI-assisted development workflows and MCP tooling into the team pipeline, accelerating prototyping, debugging and code review cycles.

- Refactored and optimized legacy mobile codebases, improving maintainability, scalability and runtime performance.
- Implemented UI systems, interactive features and platform-specific native functionality for iOS and Android.
- Built modular, reusable systems following scalable architecture principles and SOLID design patterns, working in Agile/Scrum sprints with QA, designers and artists.

Level Designer | KikiriCompany · Freelance | Jul 2024 – Aug 2024 | Remote

- Designed and implemented campaign levels for the mobile title Blaze of Empires using Unity.
- Built gameplay scenarios tuned for pacing, difficulty progression and player engagement across the campaign arc.
- Integrated gameplay mechanics and level scripting in the in-house editor toolset, iterating and balancing levels from playtest feedback.

Game Programmer | Streamline Studios · Full-time | Jan 2023 – Feb 2024

- Developed gameplay prototypes and interactive systems in Unity, integrating UI, animation systems and art pipelines.
- Built VR experiences in Unreal Engine 5 using Blueprints and C++.
- Authored technical game design documentation (GDDs and TDDs) for internal video game projects.
- Collaborated across multidisciplinary teams on rapid prototyping and fast feature iteration cycles.

Video Game Team Lead | Metaskins Studios · Full-time | Feb 2022 – Dec 2022 | Medellín, Colombia

- Led and coordinated multidisciplinary development, UI/UX, 2D/3D art and animation teams building games and interactive experiences in Unity.
- Managed production, task tracking and collaboration between technical and creative areas across metaverse, blockchain and real-time interactive projects.
- Integrated Web3 and blockchain systems into interactive products within Agile workflows.

Game Developer | Idioma+ · Full-time | Aug 2021 – Feb 2022

- Developed gameplay systems for a 3D educational RPG in Unity, including combat, magic, enemy and interactive systems.
- Integrated UI, animations and assets into a gamified learning experience, collaborating with multidisciplinary technical and creative teams.

Game Developer | Geta Club Play · Full-time | Feb 2021 – Aug 2021

- Developed educational mobile games in Unity, integrating gameplay systems, UI and interactive logic for child-focused experiences.
- Created mechanics and minigames focused on engagement, learning outcomes and accessible mobile interaction, integrating art assets into the build.

Unity Developer | Joycom Games SAS · Contract | Oct 2020 – Dec 2020

- Developed gameplay mechanics for the PC racing game Eco Troopers Natural Racing using Unity and C#.
- Implemented driving, interaction and arcade gameplay systems and logic within a production game environment.

Unity Developer | DreamHouse Studios | Apr 2019 – Dec 2019 | Medellín, Colombia

- Developed immersive VR experiences in Unity for HTC Vive, integrating interaction systems and tracker-based real-time experiences.
- Contributed to XR applications and interactive prototypes, collaborating with design and art teams on gameplay and immersive technology.

EDUCATION

Engineering in Game and Interactive Media Design | Universidad Pontificia Bolivariana | 2015 – 2021

CERTIFICATIONS & PROFESSIONAL TRAINING

- Unreal Engine 5 C++ Developer Course – GameDev.tv (2023 – 2024)
- Professional Course in Video Game Design – Platzi (2020)
- Git & GitHub Professional Course – Platzi (2020)

LANGUAGES

Spanish (Native) | English (Professional Working Proficiency)
