PROFESSIONAL SUMMARY

Interactive Software Developer with 6+ years of experience building mobile applications, interactive software and XR experiences with Unity and C#. Specialized in gameplay and interactive systems, UI implementation, refactoring of legacy codebases and modular, scalable architecture. Hands-on experience integrating AI-assisted development workflows and MCP tooling into production pipelines to accelerate prototyping, debugging and code review. Works comfortably in Agile/Scrum teams alongside QA, design and art, with a background in team leadership and technical documentation.

CORE COMPETENCIES

Unity Development | C# Programming | Mobile Application Development (iOS/Android) | XR / VR Development | Interactive Systems | UI Implementation | Software Architecture | Modular & Reusable Systems | Legacy Code Refactoring | Performance Optimization | Technical Prototyping | AI-Assisted Development | Agile / Scrum | Code Review | Technical Documentation | Team Leadership

TECHNICAL SKILLS

Programming: C#, C++, TypeScript, Python (foundational), Object-Oriented Programming, SOLID principles, Design Patterns, Modular Architecture, Performance Optimization, Debugging & Profiling

Unity: URP, Prefabs, Addressables, ScriptableObjects, Animator, Timeline, Physics, UI Toolkit / uGUI, Native plugin integration, Build pipelines for iOS and Android

Mobile & XR: iOS and Android development, Platform-specific native functionality, Cross-platform deployment, WebGL, VR/XR development (HTC Vive, tracker-based interaction systems)

Other Engines: Unreal Engine 5 (Blueprints, C++)

AI-Assisted Development: Claude Code, MCP (Model Context Protocol) workflows, Prompt Engineering, LLM-powered internal tooling and Slack bot automation, ChatGPT workflows

Tools & Practices: Git / GitHub, Visual Studio, Cursor IDE, Jira, Trello, Figma, Scrum, Agile, Kanban, Code Review, Sprint Planning, Technical Documentation, Remote Team Collaboration

PROFESSIONAL EXPERIENCE

Video Game Designer | indie.io (Freedom Games) · Freelance | Jun 2026 – Aug 2026 | Remote

- Designed and deployed an internal AI assistant built on Claude and MCP, integrated into the studio Slack workflow to automate review and documentation tasks across a 7-title portfolio.
- Evaluated builds across seven internal products, producing structured written technical and design feedback for studio leadership on systems behaviour, UX and balance.
- Maintained internal knowledge bases and living documentation as a single source of truth for distributed teams.

Interactive Software Developer – Unity | Alternova Inc. · Full-time | Jan 2025 – May 2026

- Developed and maintained mobile applications and interactive software in Unity and C# for production clients across iOS and Android.
- Refactored and optimized legacy mobile codebases, improving maintainability, scalability and runtime performance.
- Designed modular, reusable systems following scalable architecture principles and SOLID design patterns, reducing duplication across projects.
- Implemented UI systems, interactive features and platform-specific native functionality, integrating with client APIs and device capabilities.
- Introduced AI-assisted development workflows and MCP tooling into the team pipeline, accelerating prototyping, debugging and code review cycles.
- Collaborated in Agile/Scrum sprints with QA, designers, artists and developers, participating in planning, estimation, code review and retrospectives.

Level Designer | KikiriCompany · Freelance | Jul 2024 – Aug 2024 | Remote

- Implemented campaign levels and gameplay scripting for the mobile title Blaze of Empires in Unity, iterating on pacing and difficulty from playtest feedback.

Game Programmer | Streamline Studios · Full-time | Jan 2023 – Feb 2024

- Developed interactive prototypes and gameplay systems in Unity, integrating UI, animation systems and art pipelines.
- Built VR experiences in Unreal Engine 5 using Blueprints and C++.
- Authored technical documentation (GDDs and TDDs) for internal projects and collaborated on rapid prototyping and feature iteration cycles.

Technical Team Lead – Interactive Products | Metaskins Studios · Full-time | Feb 2022 – Dec 2022 | Medellín, Colombia

- Led and coordinated multidisciplinary development, UI/UX, 2D/3D art and animation teams delivering interactive products in Unity.
- Managed production, task tracking and cross-area collaboration across metaverse, blockchain and real-time interactive projects within Agile workflows.
- Integrated Web3 and blockchain systems into client-facing interactive applications.

Unity Developer | Idioma+ · Full-time | Aug 2021 – Feb 2022

- Built gameplay and interactive systems for a 3D educational application in Unity, including combat, progression and interaction logic.
- Integrated UI, animations and assets into a gamified learning product alongside technical and creative teams.

Unity Developer | Geta Club Play · Full-time | Feb 2021 – Aug 2021

- Developed educational mobile applications in Unity, integrating interactive systems, UI and accessible interaction logic for child users.

Unity Developer | Joycom Games SAS · Contract | Oct 2020 – Dec 2020

- Implemented driving, interaction and arcade systems for the PC title Eco Troopers Natural Racing using Unity and C#.

Unity Developer | DreamHouse Studios | Apr 2019 – Dec 2019 | Medellín, Colombia

- Developed immersive VR applications in Unity for HTC Vive, integrating interaction systems and tracker-based real-time experiences.
- Contributed to XR applications and interactive prototypes with design and art teams.

INDEPENDENT PROJECTS

Founder & Developer | EmberBlast | 2018 – Present

- Develop and publish independent games for PC and mobile, owning end-to-end production: architecture, gameplay programming, UI integration, build deployment and release.
- Apply AI-assisted production workflows across design, code and content pipelines; built an audience of 20,000+ followers through devlogs and social content.

EDUCATION

Engineering in Game and Interactive Media Design | Universidad Pontificia Bolivariana | 2015 – 2021

CERTIFICATIONS & PROFESSIONAL TRAINING

- Unreal Engine 5 C++ Developer Course – GameDev.tv (2023 – 2024)
- Professional Course in Video Game Design – Platzi (2020)
- Git & GitHub Professional Course – Platzi (2020)

LANGUAGES

Spanish (Native) | English (Professional Working Proficiency)
